Maintenance Products Ltd.

myFresh 2.0

Delivers targeted, clean and efficient air freshening for small, personal spaces

Small, Powerful & Efficient

myFresh's motion sensor detects movement and triggers the small, high speed fan, which moves 5-10 times more air than typical dispensers, turning periodically for as long as the space is occupied. Its unique design creates better experiences through superior efficiency & cleanliness.

**MYCABF6
Dispenser**
6/case

Upgrade to myFresh 2.0

- Light sensor is more discreet with no LED display
